Unit: Science for Success	Lesson 9 : Life Science: Guided Practice and Unit Practice
Objectives The student will be able to: •	**Materials:** • New Readers Press Science for the GED Test pages 34-40. • Surfaces or computers for each student. • http://gedtestingservice.com/freepractice/download/GED_Science/GEDSciencePracticeTest.html • http://www.classzone.com/books/ml_science_life/oltp_welcome.cfm • http://glencoe.mheducation.com/sites/0078617022/student_view0/standardized_test_practice.html
 **WDOK:** **CCSS:** **SDSS:**	**Key Words**

Introduction: Today is our last day to work on life science. We will be completing the book review pages 34-40. You will need to go back in the book to the previous lessons to find some of the answers. Near the end of class we will correct and discuss the review pages. Feel free to take notes on anything you wish. Ask questions and work together on whatever you wish.

Instructional Activities: 1. Complete pages 34 through 40 of *Science for the GED Test*.
2. Go to the class zone web site listed above and take the practice life science test. It is 10 questions.
3. Use the login listed above to take a free GED practice test for science. The practice is one fourth of the regular test.
4. The Glencoe site listed above has 25 life science tests; so it gets quite specific. We will not have covered many things, but it is still a good learning tool especially since at the end of a 10 question test it shows you the correct answers and explains why it is the correct answer. Do as many tests as you wish in this class time. Take notes and use your notes too to answer questions.
